Website Enhancements Summary

- Responsive Navigation with Flexbox

A fixed navigation bar was added using Flexbox to provide smooth and centered navigation across sections like About, Skills, Experience, Education, and Contact.

- Modern Typography with Google Fonts

Integrated two Google Fonts Work Sans for clean body text and Playfair Display for elegant headings enhancing readability and visual hierarchy.

- Visual Hierarchy & Styling

Applied a soft color palette using CSS variables, balancing professionalism and approachability. Cards with shadows and rounded corners create depth and structure.

- Smooth Section Transitions

Implemented a fade-in animation for content sections to improve user experience and give a polished, dynamic feel to the page.

- Responsive Layout and Centered Hero Section

The hero section is fully responsive and centered using Flexbox, ensuring the site looks good across different screen sizes.

- Structured & Clear Content Presentation

Sections are clearly separated with headings and subtle backgrounds, making information easy to navigate and visually digestible.

- Contact Information Display

A dedicated contact section presents email, phone, and location in a clean, user-friendly format with accessible links.
